Improves Health Conditions

- Lifestyle, medications and consumption of liquors and cigarettes makes the body acidic. Pie water produces anti-oxidants that eliminates free radicals in the body and has non-ionizing effects that lowers down the body's acidity levels.
- Removes residual chlorine which is harmful to our body and controls pH levels.
- Carries more oxygen that improves the body's circulatory system, giving a better rehydration process that makes the body recover from tiredness and illnesses faster.
- Pie water has smaller molecular structure than of regular water that improves efficiency of the water in providing our cells with oxygen and minerals while flushing away toxins.

Slows Down Ageing Process

- Carries calcium and more oxygen that improves the body's absorption of nutrients and minerals making us strong and healthy.
- Promotes good mineral balance that eliminates excessive mineral content of the water that improves skin and hair appearance.
- Improves longevity of life.

Not Only For Drinking But Also For Cooking

- Soaking fruits and vegetable in Pie water removes pesticide residues which are harmful to our body. It also removes insects, artificial coloration keeping fruits and vegetable fresh and crispier.
- Cooking using pie water brings out aromatic taste of rice and soup. Not only that, it also brings out the aroma of tea and coffee.
- Soaking meat, poultry and fish to pie water removes bacteria and microscopic worms making the meat more tender and brings out its natural flavor.
